PART 1

# SINGLE SURVEY

A report on the condition of the property, with categories being rated from 1 to 3.

# Single Survey

# Survey report on:

Surveyor Reference	J4044
Customer	Mrs. E Fogarty
Selling address	48 Cupar Mills Cupar KY15 5ES
Date of Inspection	11/03/2024
	Y
Prepared by	Nigel Forrest, MRICS St Andrews - Allied Surveyors Scotland Plc

#### 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a detached extended villa with single garage and garden ground.	
Accommodation	GROUND FLOOR: Entrance Vestibule, Living Room/Dining Room, Open Plan Kitchen/Living Area, Utility Room and Toilet.	
	FIRST FLOOR: Master Bedroom with En-Suite Shower Room, Two Further Bedrooms and Bathroom.	
Gross internal floor area (m2)	109m2 or thereby.	
Neighbourhood and location	The subjects form part of a modern residential development of similar type properties, on the West most side of Cupar. Essential facilities/amenities are available in the town.	
Age	Originally built 2006 and extended 2016.	
Weather	The weather was fair and dry at the time of inspection.	
Chimney stacks	Not Applicable.	
Roofing including roof space	The roof is timber framed, pitched and tiled, with some lead flashings.	
	Access to the roof space was gained via a trap hatch formed in the landing ceiling. No light or ladder was provided, and a head and shoulders inspection was carried out. There was insulation between/over the joists, and the roof is construction of pre-formed timber trusses.	

Rainwater fittings	Sloping roofs were visually inspected with the aid of binoculars where required. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms.  Rainwater fittings are of PVC.
Rainwater fittings	Visually inspected with the aid of binoculars where required.
Main walls	The main walls are of modern timber frame construction, roughcast block outer leaf.  Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.
Windows, external doors and joinery	Windows are fitted with PVC double glazed units. The front and rear doors are of composite materials. There is also patio doors from the living room.  Facias are of PVC.  Internal and external doors were opened and closed where keys were available.  Random windows were opened and closed where possible.  Doors and windows were not forced open.
External decorations	The various external components are of low maintenance PVC.
Conservatories /	Visually inspected.  Not Applicable.

Not Applicable.
There is a single attached garage with an up and over door, houses the central heating boiler and electrics.
Visually inspected.
The subjects enjoy an area of garden ground to the front and rear of the property, and boundaries are mainly of timber fencing.
Visually inspected.
Ceilings are plasterboard throughout.
Visually inspected from floor level.
Internal walls are in plasterboard with some finishes being tiled/wet wall material.
Visually inspected from floor level.
Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
Flooring is of suspended timber construction, overlaid with fitted floor coverings.
No inspection was possible to any sub-floor area.
Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.
Doors, facings and skirtings are in keeping with a property of this age and type. Kitchen fittings are modern with units, work surfaces and some built-in appliances.

	There is also units within the utility room area.
	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
Chimney breasts and fireplaces	Not Applicable.
Internal decorations	The various internal components have mainly a paint finish
	Visually inspected.
Cellars	Not Applicable.
Electricity	Mains supply, with the meter and fusebox located in the garage.
	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
Gas	Mains supply, with the meter housed in an external box.
	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
Water, plumbing and bathroom fittings	Mains supply, with the plumbing system where seen, being of modern materials. Sanitary fittings comprise a downstairs toilet with wc and wash hand basin, a main bathroom with bath, electric over bath shower, wc and wash hand basin and en-suite shower room with shower cubicle, wc and wash hand basin.
	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.  No tests whatsoever were carried out to the system or appliances.

Concealed areas around baths and shower trays cannot be inspected however water spillage over a period of time can result in unexpected defects to hidden parts of the building fabric.  Heating and hot water  Heating and hot water is provided by a wall mounted gas fired boiler, located in the garage. Heating is distributed via radiators with TRV's fitted. There is also a room thermostat.  Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.  No tests whatsoever were carried out to the system or appliances.  Drainage  Drainage is connected to the main sewer.  Drainage covers etc were not lifted.  Neither drains nor drainage systems were tested.  Fire, smoke and burglar alarms  Smoke alarms fitted.  Visually inspected.  No test whatsoever were carried out to any systems or appliances.  There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.  The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.  We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will required to be installed prior to sale. This of course should be confirmed by your legal advisor.

## Any additional limits to inspection

At time of inspection the property was fully furnished with fitted floor coverings throughout. No inspection was possible to any sub-floor area.

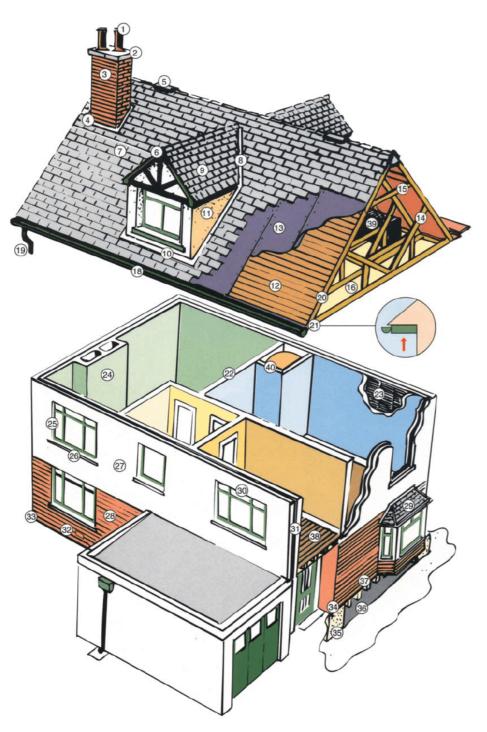

Head and shoulders inspection was carried out to the roof space only.

External inspection was carried out from ground level.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.

### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1 Chimney pots

### 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural moven	nent	
Repair category:		
Notes:	From our single inspection, there was no evidence of any significant structural movement affecting the property.	28

Dampness, rot a	nd infestation		
Repair category:	1		
Notes:	Where access was gaine infestation was noted to	ed no sign of any dampness, rot or accessible areas.	08

Chimney stacks	7	
Repair category:		
Notes:	Not Applicable.	

Roofing including	g roof space		
Repair category:	1		
Notes:	The roof coverings an property of its age an	re generally in an order consis d type. Roofs do require mair	stent with a ntenance from

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

time to time and this should be anticipated.
A head and shoulders inspection was carried out to the roof space only.

Rainwater fittings		
Repair category:		
Notes:	The Rainwater fittings showed no sign of leakage at time of inspection, but should be monitored during adverse weather.	

Main walls	
Repair category:	
Notes:	The main walls are generally in an order consistent with age and type.

Windows, extern	I doors and joinery
Repair category:	
Notes:	Windows and doors appear in an order consistent with age and type.

External decorat	ons	
Repair category:	1	
Notes:	External decoration is of low maintenance PVC.	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Conservatories /	porches	
Repair category:		0
Notes:	Not Applicable.	8-1

Communal areas			
Repair category:			
Notes:	Not Applicable.	Q.Y	2.Y

Garages and pe	rmanent outbuildings		
Repair category:	1		
Notes:	The garage appears adec	quately maintained.	2

Outside areas and boundaries			
Repair category:			
Notes:	The garden ground is reasonably well maintained.		
	Your Legal Advisor should confirm exact boundaries and liabilities for any shared/common areas serving the subject property.		

Ceilings		
Repair category:		Q.P.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes:	Ceilings finishes are generally in an order consistent with age and type.

Internal walls			
Repair category:	1		4
Notes:	Internal walls finishes were found to be generally satisfactory and an order consistent with a property of this age and type.		•

Floors including	Floors including sub-floors		
Repair category:			
Notes:	Where access was gained the flooring was found to be hard and free from significant defects.  No inspection was possible to sub-floor areas.		

Internal joinery and kitchen fittings	
Repair category:	
Notes:	Doors, facings and skirtings are in keeping with a property of this type and age. Kitchen fittings are to a modern pattern.

Chimney breasts	and fireplaces	
Repair category:		

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes: Not Applicable.

Internal decoration	ns
Repair category:	
Notes:	Decoration is generally fresh throughout.

Cellars	Q_1	Q-1	
Repair category:			$\bigcirc$ ,
Notes:	Not Applicable.		

Electricity	
Repair category:	
Notes:	The Electrical Installation appears original, and the visual inspection showed that there are no obvious signs of any significant defects or deficiencies that might suggest there could be major issues with the system.  The Electrical Installation should be tested every five years and a Certificate produced thereafter, and transferred with the sale of the property.

Gas		
Repair category:	1	D

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes:	All gas appliances should be checked on an annual basis by a Gas Safe Registered Contractor.
--------	--

Water, plumbing	and bathroom fittings
Repair category:	
Notes:	The plumbing system is of modern pattern and appeared to be adequate. Sanitary fittings are all to a modern pattern and appeared serviceable, however no tests were carried out. It is important that when baths/showers cubicles are fitted that suitable screening/sealant be maintained around the bath/tray to avoid water ingress, which can cause rot defects.

Heating and hot	water
Repair category:	
Notes:	The visual inspections indicate there are no obvious signs of any significant defects or deficiencies that might suggest there is major issues with the system. It is good practice to have the system on a service contract.

Drainage			
Repair category:	1	28	28
Notes:	No defects identified	from surface inspection.	<i>\(\rightarrow\)</i>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information

Electricity	1
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. ACCESSIBILITY INFORMATION

#### **Guidance Notes on Accessibility Information**

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground and First
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES [ ]NO
3. Is there a lift to the main entrance door of the property?	[ ]YES [x]NO
4. Are all door openings greater than 750mm?	[ ]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES [ ]NO
6. Is there a toilet on the same level as a bedroom?	[x]YES [ ]NO
7. Are all rooms on the same level with no internal steps or stairs?	[ ]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES [ ]NO

#### 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

The property has been extended/altered and our valuation assumes all necessary consents were obtained.

Your Legal Advisor should confirm exact boundaries and liabilities for any shared/common areas serving the subject property.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

#### Estimated re-instatement cost (£) for insurance purposes

290,000

Two Hundred and Ninety Thousand Pounds.

#### Valuation (£) and market comments

290,000

Two Hundred and Ninety Thousand Pounds.
